New natural gas rates

The Ontario Energy Board (OEB) has approved changes to Enbridge Gas' rates effective **Jan. 1, 2024**.

A typical commercial and industrial customer will see an annual decrease of 3.3 percent. The total impact on your bill will depend on how much gas you use.

We understand that energy affordability is a priority for Ontario families and businesses. With the OEB's approval, from October 2021 to September 2022 we took steps to smooth out the actual increase in natural gas prices charged by Enbridge Gas to help moderate the total bill increase at the time. We will continue to gradually recover the smoothed out costs over the coming months.

Delivery to You

The delivery rates that vary with consumption decreased based on our forecast cost of delivering natural gas to your home or business. These charges also include a facility carbon charge associated with the operation of Enbridge Gas' facilities to deliver natural gas to you. The facility carbon charge has decreased from 0.0162 cents per cubic meter (¢/m³) to 0.0157 ¢/m³.

Transportation to Enbridge

The transportation charge has decreased by approximately \$130.00 per year for a typical customer due to lower costs for transporting natural gas to Ontario.

Federal Carbon Charge

The federal carbon charge is 12.39 ¢/m³. This charge increases annually each April. All of the money collected for this charge goes to the government.

Gas Supply Charge

The gas commodity rate decreased by 0.3251 ¢/m³ to 15.6846 ¢/m³ based on our forecast of natural gas market prices for the next 12 months. This rate includes transportation costs to Ontario.

Cost Adjustment

The current adjustment is a charge of 2.5587 ¢/m³. The cost adjustment reflects the true-up between actual and forecast prices for prior periods. Please see the included chart for the breakdown by component.

Charges for gas used from Jan. 1, 2024 will be calculated using the new approved rates as shown in the chart. The annualized impact is based on a typical Rate 10 - Union North East customer who uses 93,000 cubic metres (m³) per year.
